# 6 2021 MJ-HMP Jurisdictional Annual Report

#### **Primary Point of Contact**

John Ripka, Fire Chief 428 Green Bay Road Winnetka, IL 60093-2576 Telephone: 847-716-3303

Email

Address: Jripka@winnetka@Winnetka.org

## **Alternate Point of Contact**

James Bernahl, Director of Engineering 1390 Willow Road Winnetka, IL 60093-2576 Telephone: 847-716-3261

Email Address: Jbernahl@Winnetka.org

#### **Annual Reporting Year: 2021**

**Background**: Cook County and participating municipalities in the county developed a hazard mitigation plan to reduce risk from all hazards by identifying resources, information, and strategies for risk reduction. The federal Disaster Mitigation Act of 2000 requires state and local governments to develop hazard mitigation plans as a condition for federal disaster grant assistance. To prepare the plan, the participating partners organized resources, assessed risks from natural hazards within the county, developed planning goals and objectives, reviewed mitigation alternatives, and developed an action plan to address probable impacts from natural hazards. By completing this process, these jurisdictions maintained compliance with the Disaster Mitigation Act, achieving eligibility for mitigation grant funding opportunities afforded under the Robert T. Stafford Act.

**Purpose**: The purpose of this report is to provide an annual update on the implementation of the action plan identified in the Cook County Multi-Jurisdictional Hazard Mitigation Plan. The objective is to ensure that there is a continuing and responsive planning process that will keep the Hazard Mitigation Plan dynamic and responsive to the needs and capabilities of the partner jurisdictions. This report discusses the following:

- · Natural hazard events that have occurred within the last year
- · Changes in risk exposure within the planning area (all of Cook County) Mitigation success stories
- · Review of the action plan
- · Changes in capabilities that could impact plan implementation
- · Recommendations for changes/enhancement.

#### **Hazard Analysis**

Hazards that represent a county-wide risk are addressed in the Risk Assessment section of the 2019 Cook County Multi-Jurisdictional Hazard Mitigation Plan Update. This section only addresses the hazards and their associated impacts that are **relevant** and **unique** to the municipality.

**Flood:** The Village has experienced impassable streets and residential flooding (especially in the west section of the Village). The area in the floodplain (around gold club) is particularly susceptible to flooding but can also be used for stormwater retention. Basements can be flooded and residents need to be educated on when and how best to seek shelter.

**Wind/Tornado:** Above ground power lines are susceptible to winds. Shelter plans must consider the impact of the winds on the power grid. 13.6% of the residents are 65 and over and need a safe place during an extended power outage.

Dam/Levee Failure: While none has occurred, a structural failure at the Skokie Lagoon Dam could impact the area.

Drought: While no drought has occurred for a substantial period, water quality and increasing temperatures are a concern for the community.

#### Natural Hazard Events in 2021

**Instructions**: Please use the **Edit** Tool to describe new hazard occurrences/incidents from the past year that have impacted your jurisdiction and had a measurable impact on people or property. (Example: A tornado occurred on [Date] and impacted [insert area] and caused damage to [insert damages]). You may also use the Edit Tool to suggest any modifications/improvements to the hazards unique to your community, as described below from the 2019 plan.

Describe 2021 Natural Hazard Events Here: None

No significant events in 2021

#### **Mitigation Strategies and Actions**

The heart of the mitigation plan is the mitigation strategy, which serves as the long-term blueprint for reducing the potential losses identified in the risk assessment. The mitigation strategy describes how the community will accomplish the overall purpose, or mission, of the planning process.

# **New Mitigation Actions**

Please submit here

### **Ongoing Mitigation Actions**

The following are ongoing actions. During the 2019 update, these "ongoing" mitigation actions and projects were modified and/or amended, as needed. Reviewers of this report should refer to the Hazard Mitigation Plan for more detailed descriptions of each action and the prioritization process. Address the following for each mitigation action:

- Was any element of the action carried out during the reporting period?
- If no action was completed, why?
- Is the timeline for implementation or the action still appropriate?
- If the action was completed, does it need to be changed or removed from the action plan?
